# FRETBOARD STRING SCHOOL

- Dobro - Lap Steel - Guitar - Weissenborn -

Used by Jerry Bryd in the late 1930's. One of the most popular tunings used today because of the wide range of chords available in both straight and slant positions, the way scales lay out on adjacent strings, and its versatility for a wide range of music including Hawaiian, Western Swing, Jazz, Pop, melodic and Rock and Roll (Volk p.22).
