How I stay up on all of these tunings:

- I keep dobros tuned in G, D, C so I'm just re-tuning a couple of strings depending on the tuning of the arrangement or scale workout.
- Also, I like D and maintain several complicated arrangements that require frequent repetitions in Dsus4 so, I keep a dobro dedicated to that tuning.
- I keep a lap steel in C6 tuning.
- I keep a Wessinborn for experimental stuff and so it changes depending on what I'm working on.
- Standard guitars are tuned to standard tuning and, yes, one dedicated to Dsus4.
